The winter crisis program maximum benefit is a component of the basic heating assistance program and the maximum benefit amount for that program is \$1,000.00. The winter crisis program relates to LEAP applicants who are facing disconnect on metered fuel or are already disconnected, or households whose bulk fuel is almost out or already out of fuel. The winter crisis amount of the benefit is the amount the household is found eligible to receive under the basic heating fuel program not to exceed the \$1,000.00 maximum benefit allowance. The year round crisis benefit maximum, listed as \$3,800, is an average maximum benefit for the furnace repair/replacement households. The year round crisis benefit is our furnace repair/replacement program. Colorado LIHEAP requires that Energy Outreach Colorado, the agency responsible for the management of the Crisis Intervention Program, make blankets, space heaters, and alternative lodging available if deemed necessary to assure the health and safety of the eligible LIHEAP households where the primary heating system is inoperable or when a fuel tank cannot be accessed due to severe weather.

In addition, Xcel Energy (serves the largest number of LIHEAP households) has the following moratorium: Xcel Energy will not shut off a customer 55 or older that lives alone during the winter months. Joint application for multiple programs Intake referrals to/from other programs One - stop intake centers Other - Describe:

The State LIHEAP office coordinates with Colorado's four regulated utilities in the delivery of percentage of income payment plans (PIPP) that provide energy assistance to low income gas and electric consumers pursuant to rules established by the Colorado Public Utilities Commission. The PIPP program is offered to LIHEAP recipients that are customers of Atmos Gas, Black Hills Utilities, Colorado Natural Gas and Xcel Energy. Black Hills Utilities will offer their electric program to non-LIHEAP low income customers as well as LIHEAP customers and the gas program only to customers receiving LIHEAP. The State LIHEAP office provides LIHEAP eligibility criteria to the utilities through a secure automated transmission method for participating PIPP households upon written consent of the PIPP applicant. Utilities will calculate the "affordable" part of the bill as a prescribed percentage of the total household income as defined in the PUC ruling. The residual difference between the "affordable" portion and the annual bill will become the "non-affordable" portion. The LIHEAP benefit will be applied to the "non-affordable" portion of the bill for all the plans that are offered to LIHEAP eligible customers. Black Hills Utilities will apply the LIHEAP benefit to the "affordable" portion of the bill for those customers enrolled in their electric program because it is being offered to non-LIHEAP low-income customers. Utilities must treat any individual LIHEAP benefit amounts that are in total greater than the amount applied to the "unaffordable" portion of the utility bill by applying it first to pre-existing arrearages, and secondly, to the account of the program participant. For Black Hills Utilities electric program participants, any LIHEAP benefit amounts that are in total greater than the amount applied to the "affordable" portion of the utility bill bill bill be applied to the pre-existing arrearages and secondly to the account of the program participant.

16.1 Describe your progress toward meeting the data collection and reporting requirements of the four required LIHEAP performance measures. Include timeframes and plans for meeting these requirements and what you believe will be accomplished in the coming federal fiscal year.

1. LIHEAP Bill Payment Assisted Households's Average Annual Usage of Main Fuel Heating, Electricity and Income - The State received the consumption and usage data from the top four gas and electric companies for FFY 2017 and was able to report the required data. The State is currently working on making changes to the LEAP system to assure that the consumption and cost data can be uploaded, which will allow for more efficient data reporting.

The State is able to obtain electric useage from 2 of our largest automated electric vendors and we will be attempting to match this with our propane primary heat users. In FFY 20 our system will be updated to collect annual propane useage from propane vendors. Vendors will be asked to provide annual costs in FFY 21.

- 2. Restoration of Home Energy Service The State has revised the LIHEAP application to gather this information and has enhanced the LIHEAP eligibility system to track this information. The State is now able to report this information annually.
- 3. Prevention of Loss of Home Energy Service The State has revised the LIHEAP application to gather this information and made enhancements to the LEAP eligibility system to track this information. The State will be able to report this information annually.
